PROFESSIONAL SUMMARY

Frontend engineer with 4+ years of experience building responsive, user-friendly web and mobile applications. Experienced shipping production interfaces with React, Next.js, TypeScript, Redux and Angular. Recently built CRM and card-infrastructure tooling at one of Africa's leading fintechs. Proven record of delivering accessible, user-focused interfaces under tight deadlines, publishing reusable open-source packages, and collaborating with designers and backend engineers in fast-paced, cross-functional teams. Growing backend exposure, a strong track record of learning quickly and solving complex problems, and a focus on results that meet or exceed business goals. Currently seeking opportunities to contribute and grow in collaborative tech environments.

SKILLS & ABILITIES

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python (basic)

Frameworks & Libraries: React, Next.js (SSR), Vue.js, Angular, AngularJS, React Native (Expo), Redux Toolkit, Zustand, Context API, Tailwind CSS, Bootstrap, SCSS, Material UI

Testing: Jest, Vitest, React Testing Library

Performance & Optimization: Code splitting, lazy loading, memoization

APIs & Backend: RESTful APIs, GraphQL, Firebase, Supabase, Convex, Node.js / Express.js (basic)

Tools & Workflow: Git, GitHub, GitLab, npm package publishing, Vercel / Netlify deployment, Agile / Scrum, code reviews

Other: Cross-functional collaboration, technical writing & documentation, knowledge management, presentation & training material development, AI-assisted development tools

WORK EXPERIENCE

Frontend Engineering Intern — Moniepoint Inc. (Women in Tech Program) Jun 2025 – Present

- Built and shipped features for Moniepoint's internal CRM system (Angular, AngularJS, Spring Boot), streamlining case handling and reducing average issue-lookup time.
- Developed the staff dashboard for card infrastructure, giving internal teams real-time visibility into card issuance and transaction operations, following a test-driven development approach.
- Modernised legacy AngularJS modules alongside new Angular components, collaborating with backend engineers and designers in an agile, code-review-driven workflow.

Lead Frontend Engineer — Emerj LLC Dec 2025 – Apr 2026

- Led frontend development for a new product, building user-facing and admin dashboards from the ground up with a reusable, responsive component architecture (Next.js, React, TypeScript, Redux, Webpack, Jest).
- Collaborated across the stack to define API contracts and translate product requirements into shipped features.

Frontend Engineer (Contract) — Quadups Ltd Nov 2024 – Present

- Delivered multiple contract-based frontend solutions for different clients.
- Built a corporate website and integrated an official business email workflow to support client communications.
- Worked on an inventory management system for real-time inventory tracking and integrated hardware devices with frontend software for seamless data flow.
- Collaborated with backend engineers and clients to translate their needs into user-friendly interfaces.

Frontend Intern — HNG Internship 13 Oct 2025 – Dec 2025

- Completed 10 progressive stages of frontend tasks, delivering production-ready applications under tight deadlines.
- Built a social media app, an e-commerce site, and a multi-framework ticketing system using React Native, Next.js, React.js and Vue.js.
- Developed an embeddable onboarding tour widget and published an npm-compatible package.
- Collaborated in a multi-stack team to deliver a real-world MVP.

Frontend Engineer — Bivora Tech Jan 2025 – Apr 2025

- Built a seasonal talent application platform with user registration and admin-managed acceptance windows.
- Developed admin dashboards and user workflows for application management and submissions.

PROJECTS

Embeddable Onboarding Tour Widget — *React, Next.js, TypeScript, npm, React Query, Tailwind CSS, Supabase*

- Built an embeddable onboarding tour widget that integrates into third-party applications, with a configurable setup so teams can customise flows.
- Published the widget as an installable npm package; managed state, data fetching and user progress with modern React patterns.

Framez — Mobile Social Application — *React Native, Expo, Clerk, Convex, Tailwind CSS*

- Developed a mobile social app with authentication, profile management, posts, interactions and user feeds.
- Integrated real-time data handling and built responsive, reusable UI components optimised for mobile.

Audiophile — E-commerce Site — *Next.js, Convex, TypeScript, React Query, Redux, Tailwind CSS*

- Built a full-featured e-commerce app with product listings, detail pages, category filtering, cart and checkout.
- Integrated real-time backend data with Convex and React Query; implemented responsive, accessible UI in Tailwind CSS.

Multi-framework Ticket Management System — *React, Vue.js, Supabase, React Query, Tailwind CSS*

- Built a ticket management app across React and Vue to demonstrate multi-framework architecture.
- Developed ticket creation, assignment and status tracking; integrated Supabase for auth and data, with React Query for state and caching.

Additional projects available on portfolio.

EDUCATION

Advanced Diploma in Software Engineering — Aptech Learning 2022

Women's Techsters Fellowship — Software Engineering — Tech4Dev 2023 – 2024

B.NSc. Nursing Science — University of Nigeria, Enugu Campus 2023 – Present
